

Use subquery in SELECT statement with an aggregate function. #3

```
/*
-- Query: select Users.name, round(
(price* (1-discount)),
2
)
as real_price
from Users, Orders
where Users.id=Orders.user_id
order by real_price desc
limit 3

*/
INSERT INTO (`name`,`real_price`) VALUES ('Marsi',4749.05); INSERT INTO (name,real_price)
VALUES ('Artur',4748.10);
INSERT INTO `` (name,`real_price`) VALUES ('Kim',4746.20);
```
